

PRODUCTS

The history and culture of Indian spices is probably as old as human civilization itself, nearly 7000 years into the past. We have combined the ancient goodness of these spices with contemporary technology, to offer you the very best flavours from India. We take pride in belonging to a nation that has shown spectacular growth in exporting spices, attaining nearly 50 percent of the global market.

ABOUT US

Company Philosophy

Hindustan Global Group companies performance is always based on the solid principles of hard work and integrity. We provide our customers honest service in any and all transactions, best prices possible, understanding and having flexibility towards all parties. We create a win win situation that will satisfy suppliers and buyers in all aspects of a business deal, fast response and total dedication to the completion of any order big or small, from any parties as long as it complies with the rules of national or international trade. We are here to Export, provide Promotion, Representation and Distribution of Indian and International quality products in international Markets.

The Company

Hindustan Global is based at Navi Mumbai, Maharashtra, India. We are professionals dealing in commodity DISTRIBUTION | TRADING | MARKETING. Over the years, we have developed outstanding relationships with the customers and the suppliers through extensive contacts in the industry both domestic and international markets. We mainly deal in Spices, Seed Spices & general Foodstuff.

Competition

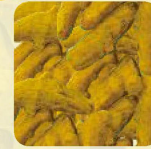

Competing edge is an unpredictable, sometimes even inefficient strategy, yet a singularly effective one in an era driven by change. It requires charting a course along the edge of chaos, where a delicate compromise is struck between anarchy and order, to the edge of time, where current business is the primary focus but actions are shaped by past lessons and future opportunities. At Hindustan Global by adroitly maneuvering through chaos and time, we can avoid constantly acting to nonstop change and instead set a rhythmic pace that others must follow, thereby shaping the competitive landscape.

Unstable markets, fierce competition, and relentless change are the only certainties in today's chaotic business world. Hindustan Global contend that to prosper in such volatile conditions, one must toss aside standard survival strategies in favour of a revolutionary new paradigm-competing.

Quality Assurance

We observe high quality standards during the manufacturing and packing of our products. We have an arrangement to make direct procurement of raw materials from the farms and cooperatives and are able to offer both processed and unprocessed spices that are commensurate with international standards. Our superior infrastructure coupled with expert minds in the field ensure the highest standards of manufacture and packaging and our products reach their destinations without losing any of their flavor, texture, taste or nutritional quality. In short, our quality standards match the important physical, chemical and microbiological parameters consistent with international standards. We strive to maintain the highest standard of quality in keeping with the highly quality conscious food export market of today. A team of quality controllers oversee every stage from the procurement of raw materials to packaging and storing of the packed products. Exceptionally high standards of hygiene and quality are maintained during every step of the processing and experts in the field inspect all raw materials at the source to check for adulteration or poor quality. Our industry experts also conduct regular studies on market requirements and modern trends in food processing and this enables us to make timely modification in product ingredients and technology. Their in-depth knowledge of our products coupled with stringent quality control measures have made it possible for us to deliver world-class products to our customers. We also offer product customization in relation to the use of ingredients. Our infrastructure can provide a variety of value-added services to our clients in accordance with their requirements. Some of them include: Pulverizing of spices. Cleaning and sorting of spices to ensure purity. Roasting & blending of spices to enhance flavor and aroma. Ensuring uniform mesh size of spice powders by the process of sieving. Special processing and preservation methods for spices in order to reduce moisture and micro contamination. Removal of all ferrous as well as non ferrous contamination in ground spices.

While concluding we are interested to serve you and looking for a long term business association.
